THE UNIVERSITY OF ALBERTA STAFF BULLETIN

EDMONTON 7, ALBERTA

JANUARY 13, 1972

HISTORY ON FILE

On a campus as large as this University's it is not surprising that some departments go virtually unnoticed by staff and students alike.

Such is the case with the Documents section of the Library. Hidden away in the basement of Rutherford Library, it is an unintentional fortress—made so by its obscure location and the absence of directional signs.

For those who are lucky enough to know about it, however, the Documents section offers more than 200,000 items containing details on such topics as the 1961 census of India, federal and provincial Public Accounts, the Board of Transport Commissions' "Regulations for the Transportation of Dangerous Commodities by Rail," and the Dower Act of Alberta.

According to W. HYRAK, Documents Librarian, the section "is a depository library for the Queen's Printer in Ottawa, so we receive, free of charge, everything published by the Queen's Printer."

This includes Parliamentary publications such as proceedings and reports from committees of the House of Commons and the Senate, studies and reports by Royal Commissions, and *Hansard*.

The collection of House of Commons debates is indicative of the extensiveness of the documents collection. It begins with Volume I, for the year 1875, and continues to the present. The Canadian Patent Office Record also goes back to Volume I, which covers the years 1824 to 1849.

Also kept in the Documents section are most of the publications issued by departments, boards, commissions, and corporations of the federal government. In some cases, like the Department of Agriculture, the documents are kept in the science library on campus, making them readily available to science students.

Provincial government publications include reports of Research Councils, geological surveys, and statistical and annual reports. Each provincial section includes a section on municipal government publications, as well.

Canadian documents are only a part of the vast collection in the library, however. The seemingly endless shelves hold bound volumes of all Parliamentary debates and copies of all departmental publications of Great

Britain. There are complete sets of the journals and treatises of the League of Nations, as well as Parliamentary debates from Austria, Germany, and other countries.

Documents also is a depository library for the United Nations. Unlike the copies of Canadian debates, however, most of the official records of UN debates are printed in summary form, rather than *verbatim*. The UN documents cover meetings of the General Assembly, the Secretariat, and all four Councils.

Documents from the United States include Congressional records dating back to 1789, and a complete set of records from the Census Bureau. Information from the various federal departments (Interior, Commerce, Labor, State) also is available.

The section on statistics has recently been enlarged, with the transfer of 1,098 statistical yearbooks from the Reference section to the Documents section.

Although the documents are not inter-filed in the main catalogue of the University Library, there is a complete file in the Documents section of all government publications and where they may be found.

The Documents section is open from 9 a.m. to 10 p.m. Monday through Thursday, 9 a.m. to 5 p.m. Friday, and 1 to 5 p.m. Saturday.

BOARD OF GOVERNORS

By FOLIO Staff

The University Board of Governors and its Executive Committee met Friday, January 7, 1972.

COMPARISON OF COSTS

A study comparing the costs of educating students in the various programs at the University was submitted to the Board by LORNE C. LEITCH, Associate Vice-President (Finance and Administration).

The report shows an increase of about 10 per cent between the 1969-70 and 1970-71 academic years.

It was noted during the discussion, however, that the 10 per cent figure was misleading in that the study covers only a two-year period. Members stated that if the study covered a five-year period, for example, the increased-cost percentage would be lower.

It also was pointed out that programs with small enrolments tended to be more expensive,

per student, than those with large enrolments.

APPOINTMENT

The Board voted approval of the appointment of PETER W. SUMMERS to the associate academic staff of the Department of Geography.

PHYSICAL EXAMINATION OF STUDENTS

A resolution regarding the physical examination of students was approved by the Board and forwarded to General Faculties Council.

Present policy is that each student admitted to the University must undergo a physical examination. Many Board members felt this was unnecessary in some faculties, but highly desirable in others, such as Physical Education.

MAX WYMAN, President, said he would like to see the resolution approved so it could be debated at General Faculties Council, since the decision on whether to require the examinations would rest with Council, unless subdelegated to the individual faculties and schools.

The resolution is as follows:

"Resolved that the power of the Board to make regulations relative to the physical examination of students at the University is hereby delegated to General Faculties Council subject to the following:

(a) That General Faculties Council shall have and possess the power of subdelegation with respect thereto.

(b) That this grant of power shall not be exclusive to General Faculties Council but shall exist co-extensively with the Board which shall retain the right to make regulations relative to the physical examinations of the students at the University and in the event of a conflict the regulations of the Board shall prevail.

(c) That this grant may be revoked at any time by resolution of the Board."

NURSING PROGRAM APPROVED

The School of Nursing has been given Board approval to establish a program leading to a Master of Nursing in Acute Illness.

Implementation of the program, scheduled for the 1972-73 academic year, hinges on the condition "that they add to their staff at least one member who has the PhD and has training and experience in the area of Nursing in Acute Illness, and as well has had experience in the direction of graduate students."

It was further recommended that "only

that route which requires a thesis be permitted, since such experience is required if the graduates are to be innovators and researchers or be advisors in these aspects of nursing in acute illness."

FACULTY OF AGRICULTURE AND FORESTRY

Members approved the General Faculties Council resolution that the name of the Faculty of Agriculture be changed to include Forestry. The faculty also has been authorized to offer a Bachelor of Science degree in Forestry.

CAPITAL CONSTRUCTION PROJECTS

The provincial government will review all capital construction projects currently being planned by The University of Alberta.

In a letter sent to the Universities Commission and forwarded to W. D. NEAL, Vice-President (Planning and Development), JIM FOSTER, Minister of Advanced Education, said:

"In order that Government may reconsider its financial priorities, may I ask that all capital projects not presently under construction be halted and details of all such proposed construction be forwarded to me at your earliest convenience."

The government review directly affects such buildings as the North Garneau Food Services Facility, Agriculture II, and Household Economics II, which will not proceed to Phase III (working drawings) until government approval is given.

NEW DIRECTIONS

The Board approved the Long Range Landscape Development Plan submitted by Hough/Stansbury.

Included in the report are recommendations that the University implement a one-way

traffic system and that Edmonton Transit System (ETS) buses be re-routed to better service the campus.

Under the new system, expected to be implemented at the end of this month, traffic will be one-way going north on 114 Street from University Avenue to 89 Avenue, east on 89 Avenue between 114 and 112 Streets, and south on 112 Street from 89 Avenue to 82 Avenue.

The area on 89 Avenue between 114 Street and Stadium Carpark will be closed to all traffic except emergency vehicles. Access to the carpark will be from 116 Street.

ETS buses will be re-routed on the one-way traffic loop and will make stops on 89 Avenue. It is expected that the parking meters on 114 Street, 89 Avenue, and in front of the Students' Union Building will be removed.

CONTROL OF CONTRACTORS

The Board Building Committee reported it is considering taking steps to improve the performance on major construction projects, many of which have encountered considerable delays.

Under consideration are the following steps:

1. A review of contract documents including the possibility of the inclusion of penalty clauses for delays in completion.
2. A review of the performance of individual firms with a view to not accepting bids from poor performers.
3. A review of University supervisory procedures to see if more pressure can be brought to bear where necessary.

PEOPLE

■ VIOLET ARCHER's "Three Sketches for Orchestra" was performed on the radio network of the Canadian Broadcasting Corporation in Ottawa on December 23 by the Winnipeg Symphony Orchestra, directed by ERIC WILD.

■ D. E. SEBORG, Associate Professor of Chemical Engineering, has been appointed to the editorial advisory board of a new journal, *Chemical Engineering Communications*.

NOTICES

ESSAY CONTEST: 'JAPAN AND JAPANESE'

Mainichi Shimbun, a leading Japanese newspaper, is celebrating its centenary in 1972. As one of the events to mark the occasion, the paper is sponsoring a worldwide essay contest, in which scholars, students, and others may enter their essays on the theme "Japan and Japanese." Winning contestants will be invited to visit Japan for the purpose of

advancing international cultural interchange.

The discussion should be made from a broad and overall point of view, covering various fields from the arts, politics and economics, to the natural sciences. Entries must be received in Tokyo by April 15, 1972.

Pamphlets explaining the details of the contest and containing application forms may be obtained from the Publications Office, 381 Central Academic Building, 432-4991.

GYMNASTICS FOR FACULTY CHILDREN

Saturday morning classes will be resumed on January 15 and will continue through to April 1. The classes will be held from 9:30 to 10:30 in the Gymnastics Room of the Physical Education Building. A fee of \$10 per student is charged for approximately 12 lessons. The instructors are members of the University Gymnastics Club. For further information call FRANCIS TILLY, 432-3466.

GRANTS FOR NORTHERN RESEARCH

The Boreal Institute for Northern Studies invites applications for 1972 research grants from University staff, graduate students, or from other professionally qualified persons with northern research interests.

One of the purposes of the Boreal Institute is to support research in the North in any recognized scientific discipline.

Application forms may be obtained from faculty and department offices or directly from the office of the Director of the Boreal Institute, Room CW 401 Biological Sciences Centre. All applications must be in by January 20, 1972.

EXTENSION COURSES

Simulations. A two-day Simulation Techniques Workshop to introduce the design and utilization of instructional simulation techniques will be held January 27 and 28. The workshop will be of value to teachers, staff trainers, and others interested in small group instruction. Emphasis will be on manually operated materials rather than computer-based models. Texts and a box lunch on the second day are included in the course fee of \$45.

A Simulation Practicum will be held on six Thursday evenings between 7:30 and 9 p.m. commencing February 3. This will give an opportunity for those interested in simulation and learning games to try out existing materials, and become more proficient in the use of this type of learning device. Those registering should have had prior experience with simulations or have attended one of the simulation technique workshops. The fee is \$20.

The instructor for both of the above courses will be AMY M. ZELMER, Assistant Professor of Extension.

Contract Law for Engineers. A seminar on Contract Law for Engineers will be held February 4 and 5 for one-and-a-half days. It is designed to highlight some of the legal problems which affect professional engineers and others who are concerned with negotiating, framing, and everyday administration of contracts. These problems should also be of interest to engineers performing professional duties as employees of contracting parties or as independent consultants. The instructors will be DAVID PERCY, Assistant Professor of Law, and WILLIAM G. GEDDES of Ross, McLennan, Rose, Geddes, and Ranson, Barristers and Solicitors, of Edmonton.

The fee is \$45, which includes materials, plus parking fee if a permit is needed.

Greek Drama in Translation. ROSI MARY NELSON, Assistant Professor of Classics, will deliver a 10-week series of lectures on Greek drama in translation, beginning Monday, January 17. The course will deal with the most famous tragedies of Aeschylus, Sophocles, and Euripides. Discussions of the plays will focus both on their literary merit, and on the social issues posed. Class hours will be from 8 to 9:30 p.m. The fee is \$25.

Registrations for all these courses are now being accepted by the Department of Extension, Corbett Hall, 432-4251.
